

ANSIYA K H

Python Full Stack Developer

Thrissur, Kerala, India | +91 7306595096 | ansiyahussain.dev@gmail.com

[LinkedIn](#) | [GitHub](#)

Open to Relocate to Dubai, UAE | Requires UAE Employment Visa Sponsorship

PROFESSIONAL SUMMARY

Python Full Stack Developer experienced in Python, Django, Django REST Framework, PostgreSQL, JavaScript and Bootstrap. Skilled in REST API development, backend development, authentication, e-commerce and database-driven applications. Built a full-stack e-commerce platform for Cicada Rise; currently strengthening React and learning AWS, seeking Junior Software Engineer or Python/Django Developer roles in Dubai.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, HTML5, CSS3

Backend: Django, Django REST Framework, Flask, REST APIs, Gunicorn

Frontend: React, Vite, Bootstrap 5, Tailwind CSS, HTMX

Databases: PostgreSQL, pgvector, SQLite, MongoDB

Authentication & Security: JWT, Authentication, Authorization, RBAC

DevOps & Tools: Git, GitHub, Docker, Render, AWS Fundamentals, Database Migrations, Production Deployment

AI & Data: RAG, Semantic Search, PyMuPDF, Sentence Transformers, PyTorch

PROFESSIONAL EXPERIENCE

Software Developer & Co-Founder | Cicada Rise

Kerala, India | July 2026 – Present

- Designed and developed the brand's full-stack e-commerce platform using Python, Django, Django REST Framework, PostgreSQL, JavaScript and Bootstrap.
- Built product catalog, product details, category browsing, search, cart, wishlist, user authentication and order management.
- Developed a custom ERP-style admin dashboard for products, inventory, orders, users, pricing, sizes and product images.
- Implemented role-based access control and secure admin authorization for protected management functionality.
- Integrated WhatsApp-based ordering to provide a streamlined checkout workflow without an online payment gateway.
- Prepared the application for production deployment, including database migrations, deployment configuration and custom-domain setup.

Independent Software Development & Professional Development |

Kerala, India | March 2025 – June 2026

- Built and refined full-stack projects using Python, Django, PostgreSQL, React, and modern web technologies.
- Strengthened React, backend development, REST APIs, databases, and deployment skills through hands-on projects.
- Built and improved a personal developer portfolio and explored React to strengthen frontend development skills.
- Continued professional development while preparing for Python Full-Stack and Software Engineering roles.

Freelance Full Stack Web Developer |

Kerala, India | December 2024 – February 2025

- Guided two student groups through end-to-end final-year Python Django full-stack projects, from initial planning through implementation and completion.
- Supported backend development, database design, frontend integration, debugging and project documentation.
- Worked with Python, Django, HTML, CSS, JavaScript and relational databases while explaining implementation decisions and development workflow.

Web Application Developer | Grapesgenix Technical Solutions Pvt Ltd

Thrissur, Kerala, India | August 2024 – November 2024

- Developed and maintained web application features using Python and Django.
- Worked on REST API development, frontend integration, debugging and application testing.
- Collaborated with the development team on feature implementation, issue resolution and code improvements.

KEY PROJECTS

Cicada Rise — Full-Stack E-commerce Platform

Technologies: Python 3.12+, Django 6.0, Django REST Framework, PostgreSQL, SQLite, JavaScript, Bootstrap 5.3, HTMX, GSAP, ScrollTrigger, Unicorn, WhiteNoise, ReportLab, Git, Render

- Built a responsive fashion e-commerce storefront with product catalog, search and sorting, categories, product variants, stock availability, wishlist, cart, customer accounts and order history.
- Created a custom ERP dashboard covering revenue and order metrics, product/SKU/image administration, variant inventory and restock logs, order status workflows, customer management, review moderation and brand settings.
- Implemented WhatsApp-based checkout, configurable shipping/payment details and downloadable PDF invoices; prepared the application for PostgreSQL-backed production deployment.

DocuMind — AI-Powered Document Intelligence Platform

Technologies: React 19, TypeScript, Vite, Tailwind CSS, React Router, Python 3.12, Django 5.2, Django REST Framework, JWT, PostgreSQL, pgvector, PyMuPDF, Sentence Transformers, PyTorch

- Built a full-stack AI document platform with secure JWT authentication, PDF upload and validation, automated text extraction, semantic vector search, and Retrieval-Augmented Generation (RAG) Q&A with grounded page-level citations.
- Implemented PostgreSQL + pgvector semantic search using 384-dimensional Sentence Transformer embeddings and cosine similarity, with strict per-user data isolation.
- Developed PDF processing with PyMuPDF, page/chunk mapping and idempotent re-processing; built REST APIs for authentication, document management, processing, search and RAG Q&A.
- Verified 17 Django backend tests passing, clean TypeScript compilation, and a successful Vite production build.

Hotel Management System

Technologies: Django REST Framework, PostgreSQL, JavaScript, HTML, CSS

- Database-backed hotel management application with REST APIs and web interface, demonstrating backend architecture, PostgreSQL integration and full-stack development.

EDUCATION

Bachelor of Vocation (B.Voc) in Software Development |

Calicut University, Carmel College, Mala, Kerala | 2020 – 2023

Python Full Stack Development Training |

Luminar Technolab, Kakkannad | September 2023 – May 2024

CERTIFICATIONS

- Certified Web Developer — Specialized in Python Django
- NACTET Certification
- PHP Workshop
